

Is there any Climate Finance for Carbon Capture and Storage, Especially in Emerging Economies?

Date and time: Tue, 19 Nov 2024 15:00-16:30

Room: SIDE EVENT 7, Blue Zone

Organisers: The University of Texas at Austin, IEAGHG, Bellona, CCSA, International CCS Knowledge Centre

Theme: CCS projects require financing. Challenges, requirements, and success stories of financing CCS in developed countries will be presented. Azerbaijan is an emerging economy with significant emissions, so the challenges for CCS finance in emerging economies will be assessed, with examples of success.

Speakers:

- Tim Dixon, General Manager and Director, **IEAGHG** - Moderator and scene-setting
- Brad Crabtree, Assistant Secretary at the **US Department of Energy** - Welcome
- Sarah Jones, **UK Minister for Industry and Decarbonisation** - Welcome
- Dr. Katherine Romanak, Research Professor, **The University of Texas at Austin** - Safety and de-risking geological storage
- James Fann, President and CEO, **International CCS Knowledge Centre** - Canadian incentives and de-risking capture
- Olivia Powis, CEO, **CCSA** – UK Policies and Incentives
- Jonas Helseth, Director, **Bellona** – EU policies
- Clarine Ovando, Climate Technology Advisor, **UNEP** – CCS in TNAs
- Donnell Cain, Senior Project Development Specialist, **CCCC** – Role of the CCCCC in the Green Climate Fund and success in Trinidad and Tobago
- Questions from audience

Exhibit Booth 27, 18 - 21 November

Information will be provided by institutions with extensive research experience and technical training expertise in Carbon Capture and Storage (CCS). These institutions include the Gulf Coast Carbon Center, IEAGHG, CCSA, and the International CCS Knowledge Centre.
