

A large scale and flexible CO₂ Transport and Storage solution

Offshore Storage Workshop

19 May 2022

ABOUT THE PROJECT

Aramis aims to contribute to the energy transition by offering a CO₂ transport and storage solution for hard-to-abate industries

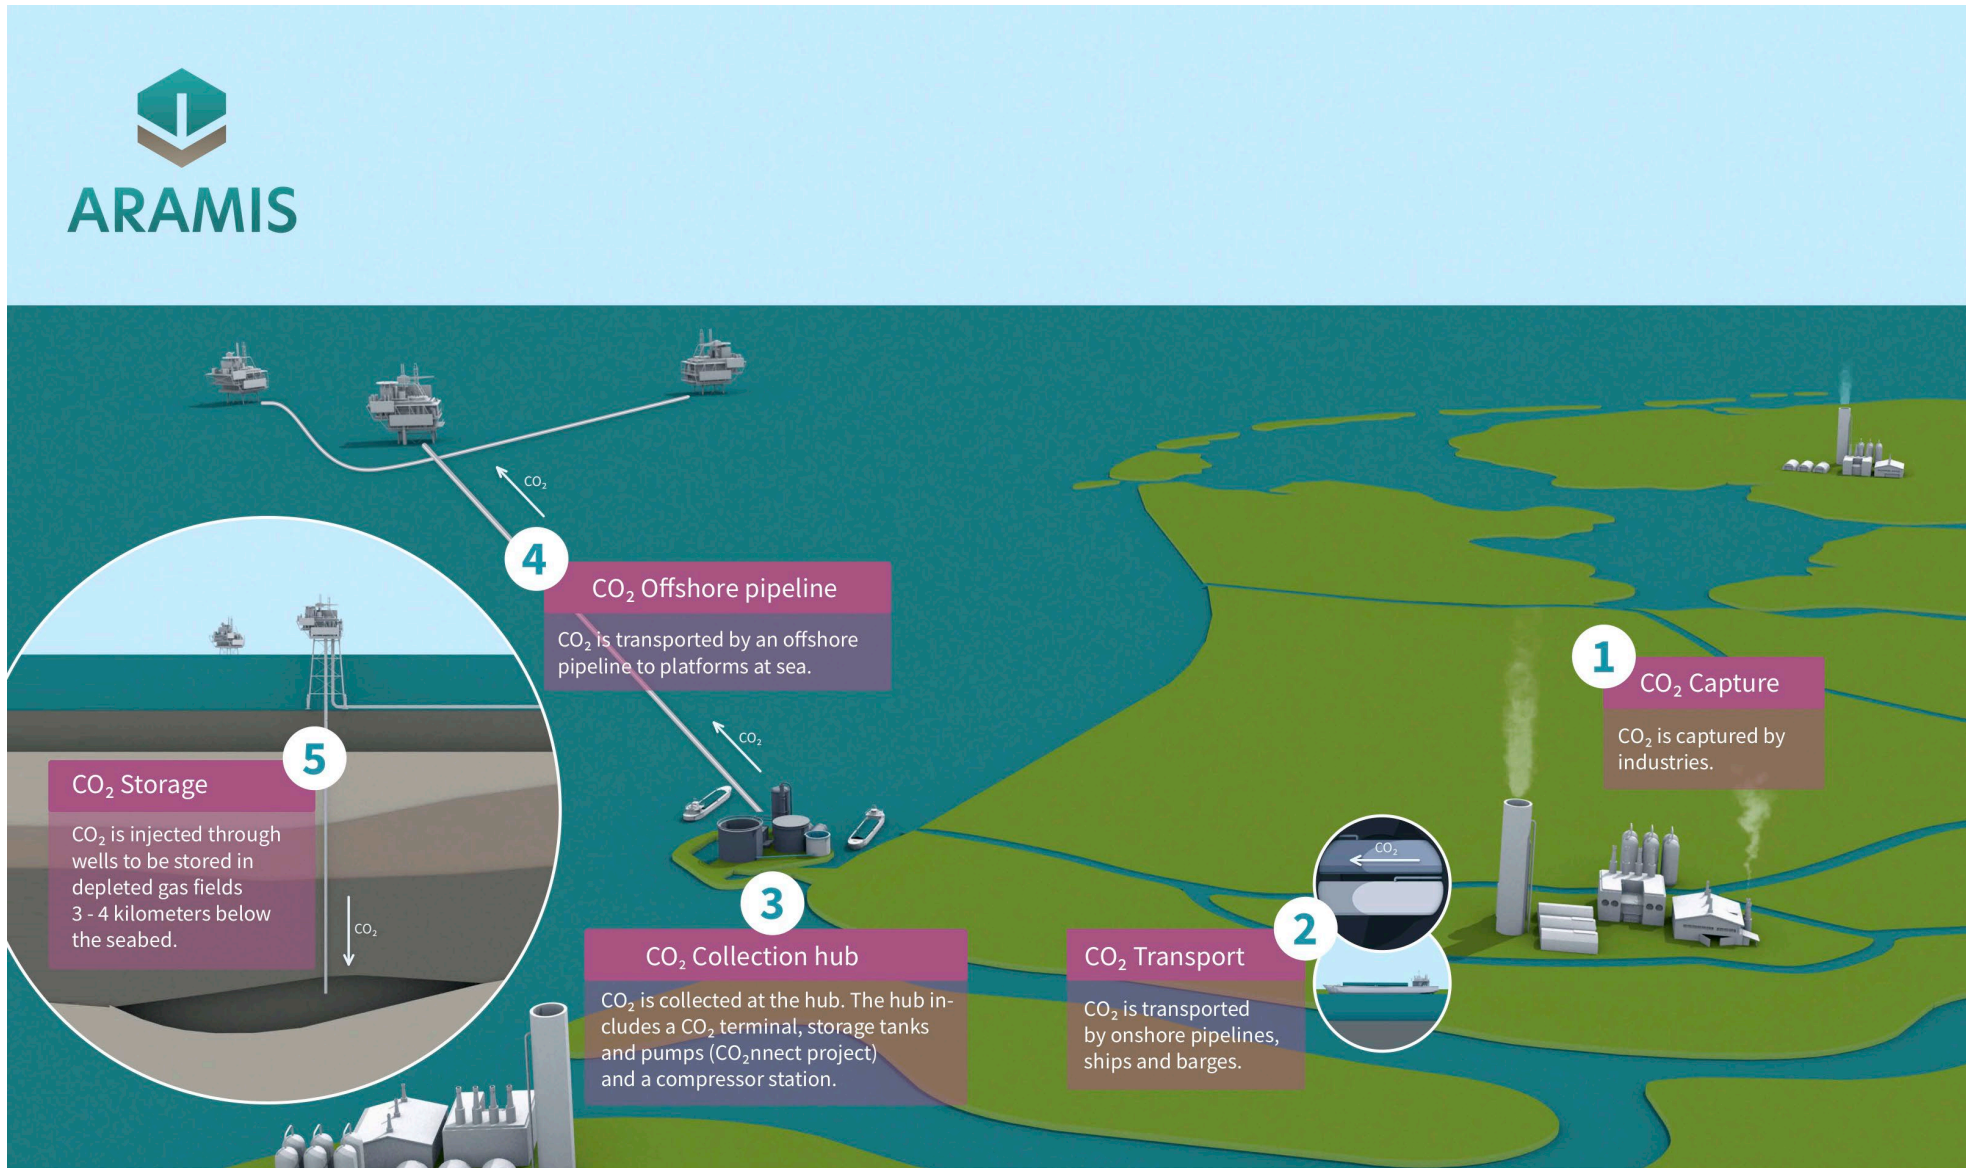

Transport

- ◆ Shipping via coasters and barges to a new terminal (CO₂next project)
- ◆ New offshore pipeline

Storage

- ◆ Depleted gas fields

High-level timeline

STEP 1

2019-2021

Feasibility study and setting-up of partnerships. Application for EU PCI-status

STEP 2

2021-2023

Selection of the concept jointly with emitters and other stakeholders

STEP 3

2024

Final investment decision (FID) and execution of the project

STEP 4

2026-2027

Go-live. First CO2 transport & storage of Dutch emissions

STEP 5

>2027

Potential expansion cross-border (Belgium, Germany and France)
